

Szonda Benjamin Márk

I am a persistent and ambitious person who approaches every task with dedication and a growth-oriented mindset.

During my studies, artificial intelligence, neural networks, and automation became the main areas of my professional interest, which is why I chose to write my thesis on the topic of "Investigating the Applicability of Adversarial Neural Networks in Security Systems."

My interest in this field of research has remained strong ever since, and I continuously expand my knowledge through self-learning and practical development.

Work Experience

IT Intern 3 month

DE Kancellária Webportál-, Alkalmazásmenedzsment és VIR Központ, Debrecen
